

JvR Online

Developed with Africa in mind • No LOCK-IN
Cost-effective • Convenient

As an independent test distributor, JvR Psychometrics have been providing online assessments for some time. As we began publishing our own assessments and those of our SA developer partners, the need arose for launching our own online test administration platform.

JvR Online was originally developed to host our local and self-published assessments. These assessments are built with Africa in mind; they report using SA norms and are great value for money. However there has already been interest from our international test publishing partners and JvR Online now also allows you to administer Hogan assessments, with more assessments to be added in the future.

It is our goal to make this platform as convenient for you as possible.

As with most online administration platforms you get the cost and time savings benefit, but JvR Online also stands out in some other important ways:

1. ALL LOCAL (& MOST INTERNATIONAL) ASSESSMENTS HOSTED ON THE PLATFORM ARE VALIDATED WITH SA NORMS

You can safely administer our assessments, knowing that they are backed by research and provide valid results for your clients.

2. PROJECTS ARE EASY TO SET-UP

For each project you only have to generate one link that you can send to all candidates. They can then register themselves and proceed.

3. NEVER RE-START AN ASSESSMENT AGAIN

Your candidates' progress gets saved as they progress through their assessments. This means that if the internet drops, or you have some technical difficulties before the assessment has been completed, your candidate doesn't have to re-start from the beginning.

4. REPORTS DELIVERED TO YOUR INBOX, IMMEDIATELY UPON COMPLETION OF THE ASSESSMENT

There is no need for you to go back into the system to generate reports, they are compiled and delivered instantly and automatically to your inbox once your candidate completes his/her assessment.

5. WORRYING ABOUT UNPLANNED ASSESSMENTS ARE A THING OF THE PAST

There are no credits required to use the JvR Online platform – we bill you at the end of each month for the assessments you've used. This means you don't need to contact us to use the system, so if you have a crisis and need to assess the following morning at 5am, there is nothing stopping you to do so. You can however opt to use PO's or cash if you wish to have more control over your spending.

6. YOU ARE NOT 'LOCKED-IN' TO USE ONLY OUR PLATFORM OR PRODUCTS

There are no licences, contracts or obligations to use only our service in the administration of batteries.

7. FREE ACCESS TO YOUR DATA

You can export your data to excel at any time to be used in your own research or other integrations. No charge.

8. EASILY MANAGE YOUR ASSESSMENT USAGE WITH SCHEDULED REPORTING

You can easily set-up and schedule reports to be sent to your email inbox. These reports will give you a breakdown of who you have assessed on what and how much.

9. ASSESSMENT MANUALS CAN BE DOWNLOADED FOR FREE

All locally developed products' manuals will be available as free downloads from the JvR Online resource centre.

THIS PLATFORM IS IN ACTIVE DEVELOPMENT. YOU CAN SEE THE ASSESSMENTS CURRENTLY AVAILABLE BELOW:
